

Modified Shipping Containers

For the storage, handling and transfer of lubricants and similar fluids.

**Layout and design to
Turn-Key units.**

Modified Shipping Containers

The economical solution to lubricant storage and dispensing

Shipping containers can be modified and equipped to accommodate the safe and secure storage, transfer and dispensing of lubricants. Containers are custom designed and fabricated to meet the specific needs of each individual customer. Lubrication equipment layouts, specifications and configurations are designed by people experienced in the storage, handling and dispensing of lubricants. You can be certain that your container will be properly equipped to meet your specific requirements.

Containers can be equipped with;

- Permanent storage tanks
- Supports and locators to accommodate portable tanks
- Spill containments
- Drum storage areas
- Pumping, transfer and dispensing equipment.
- Electronic level and inventory control.
- Shelving & cabinets.
- Roll up doors, man doors and windows.
- Ramps
- Insulation and heat
- Lighting and electrical
- Office space
- Etc.
